Responses should be written on the answer sheets provided; begin the response to each item on a fresh page.

*Candidates are required to spend **10 minutes** preparing, **15 minutes** writing and **5 minutes** checking their work.*

1. Poor diet is currently a common problem faced by various communities in Uganda. Most people think they are eating “**good**” food but when they are actually feeding on a poor diet. This has resulted into cases of overweight, obesity and some deficiency diseases among children. The government through the ministry of health has launched a campaign on the aspect of healthy feeding.

Task

Write an article that will be used by the ministry of health to address the issue during the campaign.

2. In your village, the annual crop yields have been low for the last five seasons. This has been attributed to the dry climatic conditions experienced in the area. The people of your area....
